The four valves per cylinder (two intake and two escapes) were driven by the pivot-like rock arms. IHI turbocharger The EE20 engines have IHI turbochargers with variable nozzle turbines (VNTs). Usually, the VNT use mobile vans in the turbine housing to adjust the airflow to the turbine to perform a comparable exhaust speed and rear pressure along the engine's revolution range. To improve the engine's torque at speeds below 1800 rpm, the nozzle fins would approach narrowing the air trajectory and increasing the airflow speed. However, at higher motor speeds, vans would be opened to reduce airflow resistance and improve fuel consumption. Initially, the turbocharger was placed under the engine. For the Euro 6 EE20 engine, it is understood that the turbocharger was moved to the bottom right of the engine. It is understood that the maximum turbine speed for IHI turbochargers used in the EE20 engine is 190,000 rpm. Injection and combustion The Euro 4 and Euro 5 EE20 diesel engines had a common Denso injection system with injectors of eight holes, of solenoid type that achieved an injection pressure of 180 MPa. For the Euro 6 EE20 engine, however, the injection pressure increased to 200 MPa. For the EE20 engine, the injectors were placed at an angle of almost 90 degrees to the cylinder and were shorter than those used in the diesel engines of four cylinders online. The Euro 5 and the Euro It is understood that 6 EE20 engines have ceramic-type glow plugs. EGR and DPF The EE20 diesel engine had a water-cooled exhaust gas recycling system (EGR) that recycled exhaust gases to intake to reduce combustion and gas temperaturesNOx emissions. The Euro 5 and Euro 6 EE20 engines had a closed-close diesel particle filter (DPF); both the oxidation catalyst and the DPF were placed next to the turbocharger to use the heat of the exhaust air. Alternator Alternator for the diesel EE20 engine had a voltage load control system that, to reduce the alternator load in the engine, reduced the load voltage when the vehicle was idling or was driven at a constant speed and increased the voltage at low speed. Changes in Euros The EE20 diesel engine compatible with Euro 6 emissions was introduced to the Subaru BS Outback in 2014 and the Subaru SJ ,II Forester in 2015. In relation to the Euro 5 version, the changes for the Euro 6 EE20 engine include: An open-deck lock; an increase in piston crown capacity; a new piston skirt coating was introduced to reduce friction; a reduction in the compression ratio to 15.2:1 to a lower combustion temperature and reduce the NOx emissions; a common fourth-generation rail injection system was introduced for greater injection pressure (200) The type and quantity of precious metals in the oxidation catalyst and the DPF catalyst were also revised; the number of idlers used in the auxiliary belt system was reduced; a more precise sensor of battery current, voltage and temperature was measured; and, the rear fange and support material, exhaust pipe and end plate material werel mean, I'm not going to go. The main research involvement involves optimizing doses and combinations of phones for patients with drug -resistant tuberculosis or TB/HIV coinfection, and drug addition antituberculosis in children. It participates in research projects in every 4 frica, as in Asia and Sudamerĳca, where a key inter -s © s is the support and orientation of pharmacological research projects initiated by researchers. Myer, Prof Landon Mbchb Ma Mphil PhD; Professor, Center for Infectious Epidemiology & quot; Research, School of Public Health & quot; Family Medicine thirty -one of the supervised mēster students; Wide researchs are: HIV/AIDS epidemiology, other sexual transmission infections & quot; tuberculosis; maternal and child health; reproductive health of women. NTSEKHE, PROF MPIKO BA, MD, MPHIL (CARDIOL), PHD, FCP (SA), ACT Cardiol (SA), F.A.C.C. Helen and Morris Maueberger Professor and President of Cardiology, Department of Medicine, University of Cabo del Cape and Chief: Cardiology Division Groote Schuur Hospital. Continuous research: research of pericarditis management (IMPI), inflammatory determinants of the severity of the disease and the result of treatment in patients with tuberculosis, sympathetic denervation of the left heart disease for the pilot study of cardiomyopathy, study of myocy fibrosis Radica associated with HIV. Silwa-Hahnle, Prof Karen Director, Flatter Institute for Cardiology Research; Diploma in Tropical Medicine and Hygiene, specialist, cardiologo (2000). He is one of the very rare cardiologists of Sudaver that is clodically active and trained in mĳ ĳē fundamental molecular laboratory, combining epidemiological and laboratory skills. Widely published in local and international magazines and books of various topics related to cardiovascular medicine. Internationally recognized for his prominent work in the card of heart failure. Collaborations with a series of prestigious clinical and international centers She has an appointment as an associate professor at Queensland University, Brisbane, Australia and as a visiting professor at Baker Institute in Melbourne, Australia. Australia.Professor Dan Professor and Head of Department, Psychiatry and Mental Health; Chair in Psychiatry; Director, Brain and Behavior Initiative (BBI). The brain and behavior initiative (BBI) allows multidisciplinary, multidisciplinary collaborative research in cognitive and affective neurosciences and brings together the experience on phennotipated, genotyped, cognized, brain images and molecular signatures to address brain-behaviour problems. New experimental techniques, including brain imaging, genetic testing and neuropsychological assessment, combined with new theoretical ideas, have opened a significant potential for the advancement of new diagnostic tools and treatments for people with mental disorders. The initial approach to trauma and resilience has now been extended to work on substance and neurohy. Zar, Professor Heather Mbchb, FAAP, PhD is head of pediatric pulmonology at the Red Cross Children's Hospital, Cape Town University. Its research focuses on childhood lung health, including HIV-associated lung disease, childhood pneumonia and childhood TB. In 2014 he received the 2014 Lung World Health Award, awarded by the American Thoracic Society at a ceremony in San Diego, in recognition of the work he has "the potential to eliminate gender, racial, ethnic or economic disparities around the world." Zācēħke, Assoc ProfĂĳ Liesl MBCHB, DCH, MPH, PhD (Cape Town) FC Paeds, FESC, FACC. Pediatric cardiologist, Department of Pediatric Cardiology, Cross-Red War Memorial Children Hospital; Director and Medical Specialist, Children's City Disease Research Unit, UCT. Currently regarded as a thought leader in rheumatic heart disease, both on the continent and internationally. He's got important things of international research within the community of rheumatic cardigan diseases and within the cardiovascular community. His social responsibility is reflected, among others, in numerous positions of the Board; And she is still in teaching, training and mentoring, which covers courses for practitioners, clinical officers and teachers " classes of echocardiography in South Africa, Ethiopia, Zambia and Uganda. Uganda.
